

More powerful together than apart.

Connectivity is fundamental. With Fusion, we're your partner in accessing the best of any network.

Top-notch connectivity is non-negotiable - your business's network can't function without it. With Fusion, we customize both architecture and design to meet your unique business needs. That way you can focus on what you do best.

Avoid Revenue Disruption

Whether you are a small/medium sized business or you're a part of an enterprise company, we will customize the solution to fit your specific situation so that you have zero revenue disruption from your network. And because we offer a Network Operations Center as a Service (we call it Vigilance), we can make sure your connectivity is always available.

Lift and Shift

Connectivity is vital in your business, it's certainly more tactical than strategic. Take the burden off of your IT team and place it onto ours so your team can focus on strategic initiatives for your business.

Fusion Brings It All Together

Fusion is our product name for Connectivity, which are all the networks and circuits that connect an enterprise to the internet or another remote office, data center, or cloud. These services include:

- Dedicated Internet Access (DIA)
- Broadband (DSL/Cable, Fios, U-verse, etc)
- Cloud Direct Connect
- Fixed Wireless
- 4G Cellular Wireless
- Satellite
- Private Lines
- MPLS
- VPLS

While connectivity is a necessary part of doing business, having a partner who has the ability to access the right network connection is invaluable. We customize a solution for your business, regardless of size. This way, the price is always right. We have 15+ underlying carriers and aggregators, manage the procurement and installation, and provide 24/7/365 NOC support over these solutions regardless of origin or carrier.

Big carriers cater to a variety of needs but there's no consistent relationship. Most of the time, you get diversity in product or high touch support. With Fusion, we provide both. That makes us unique.

Pro tip:

Get the most out of Fusion by combining it with **Agility** (SD-WAN aaS), **Vigilance** (NOCaaS) and/or **Alliance** (UCaaS).

When you bundle our Managed Solutions offerings, you achieve even more visibility and the highest level of support.

Why Fusion?

Scalable

Whether you need 1Meg or 10 Gig, growth plans are in place to let your connectivity solution grow at the pace of your business.

Empowering

We give our clients access to the NOC tools that provides reporting on bandwidth utilization.

Fast

We have a team that is dedicated to procurement and MACDs, as we're aware that your business needs change all the time.

Lowered Costs

Using our ability to access so many different underlying carriers, we always have access to the best value for what will work best for you.

Manageable

Monitor things from your end, or we'll manage it for you—it's entirely up to to you.

Worry-free

Business continuity and disaster recovery is no sweat, because it's all on the cloud. We customize a design for you based on your unique needs.

Simple

Easily deploy, maintain, and administer your connectivity to simplify and consolidate business communications and network.

Why NETRIO?

NETRIO has unprecedented experience and intelligence in this space. We're the best at what we do.

Expertise

We're high-touch and customer-service focused. With Fusion, the entire connectivity piece is managed for you. Our NOC service allows us to offer you support 24/7/365, so if there are any issues, we manage them. This means we do a lot more for our customers than most, and we do it very well.

Affordable

Businesses of all sizes have a unique set of needs and a budget to match. We make this service affordable to everyone by tailoring the technology to what's most appropriate for their situation, from our own products to offerings with more robust features. We're technology-agnostic and will recommend the right solution as well as manage it from the back end. The important thing is that everything is seamless to you.

Customized

We customize the solution to be specific to your needs, no matter what they are. Maybe you're a team of five working from your own homes, or perhaps you have a 50,000 person company with multiple locations. Bottom line, you need a connected network, no matter your head count. We're here to recommend the right software, keep you connected, and manage your IT for you.

Service

Just like everything else we do, we are wholly devoted to the relationships we have with our customers. That translates to white-glove treatment that our competitors just can't match. We're also on call 24/7/365 to attend to anything unexpected. And unlike your internal IT team members, we don't take time off for vacations, holidays, or sick days.
